#Reshaping the data

,As we are using Deep learning neural network, the input for this network to get trained on should be of higher dimensional. Our dataset is having three-dimensional images so we have to reshape them too higher dimensions

```
#(batch,height,width,channel)

x_test=x_test.reshape(10000,28,28,1).astype('float32')
```

y_test=np_utils.to_categorical(y_test,no_of_classes)
